

## **Ten OrthoMaryland Physicians Recognized as Baltimore's Top Doctors in *Baltimore Magazine***

Baltimore, Md. (November 1, 2009) – OrthoMaryland, one of Baltimore's preeminent orthopaedic practices, is pleased to announce that 10 of its physicians were included in Baltimore magazine's annual "Top Doctors" list.

- Jason Brokaw, M.D., pain management and chronic pain
- David Buchalter, M.D., general orthopaedics
- Mark Deitch, M.D., orthopaedics of the hand
- Lisa Enders-Grant, M.D., physical medicine and rehabilitation
- Steven Friedman, M.D., orthopaedics of the hand
- Jon Koman, M.D., sports medicine
- Jerome Reichmister, M.D., general orthopaedics
- Mark Rosenthal, M.D., orthopaedics of the spine
- Barry Waldman, M.D., joint replacement
- Ian Weiner, M.D., foot and ankle orthopaedics

"We are extremely proud of all of our top docs and are particularly pleased that, since nominations and voting were conducted by our peers, OrthoMaryland's physicians are so highly considered among the Baltimore medical community," said Dr. Robert Keehn, president of OrthoMaryland. "At OrthoMaryland, we hold ourselves to the highest medical standards and work hard to ensure we are delivering the best medical care to our patients. Having so many of our physicians included within this annual publication is a particular honor."

The 2009 Top Doctors list was compiled after more than 2,000 physicians in the Baltimore area, including Baltimore City and the five surrounding counties, were asked where they would send a family member in each of 76 specialty areas.

### ***About OrthoMaryland***

*OrthoMaryland, with locations in Owings Mills, on the campus of GBMC and a flagship office at Baltimore's Quarry Lake, is one of Maryland's oldest and most recognized orthopaedic practices. Sixteen highly-skilled physicians specialize in all areas of orthopaedics: fracture treatment, sports medicine, hand and upper extremity, total joint replacement and revision, foot and ankle, spine surgery and interventional spine therapies. The practice offers a comprehensive approach to musculoskeletal care, including surgical as well as non-surgical treatments such as pain management, physical and occupational therapy.*
